This is possible with different virtual machines like VMware or VirtualBox and for installing it you need installation setup.. The below example is related to a program named geos I am trying to install and have the same error:libgeos.

1. [ld symbol\(s\) not found for architecture x86_64 mac mojave](#)

Over the years, development changed hands several times with PCSX-Reloaded now being the main version.. And the only warnings were because of missing libs (bdb, odbc, and uuid) On a side note, the readme says libarchive is optional; may be optional on other platforms but not on mac? Libarchive-dev: Without, you can not unpack and install add-ons.. o
